PRESS RELEASE

Fachpack: Sustainable all-paper blister pack

Heilbronn, Germany, July 16, 2021 – *At Fachpack in Nuremberg from September 28 to 30, ILLIG Maschinenbau will be demonstrating how the production of sustainable all-paper blisters from recycled cardboard with different designs and contents is possible on a single, flexible packaging system. Because less is more: reduce – reuse – separate – recycle – renew.*

At booth 205 in hall 1, ILLIG will present the latest version of the HSU 35b packaging series. The system is suitable for safe sustainable blister packaging made of cardboard-plastic-cardboard combinations (double card blister) or solid cardboard for non-food products. The economical and efficient HSU 35b is designed for variable blister heights and can be configured with 3, 6, 8, 10 or 12 transport pallets for any application. The compact machine adapts to the individual requirements of packaging manufacturers with numerous equipment features. Examples include automatic product feeding, product presence control, product inlay (fixation in the carton blister), inserts for brochures, marking systems, code readers and blister lifters. ILLIG packaging systems are modular, flexible and efficient that enable brand owner and co-packers the freedom to design sustainable packaging for a variety of end markets.

About ILLIG

ILLIG is a leading global supplier of thermoforming systems and tool systems for thermoplastics and cardboard. The company's product and services portfolio includes the development, design, manufacture, installation and commissioning of complex production lines and components. With the unique packaging development, "Pactivity® 360", and the high-performance packaging systems, ILLIG supplies its customers with resource-friendly and sustainable solutions, and supports packaging manufacturers in design for recycling. With its own subsidiaries and sales agencies in over 80 countries, ILLIG is locally present in all markets around the globe. For 75 years, the family business has been serving its customers across the globe as a reliable partner for the cost-effective manufacturing of complex precision parts with innovative technology of unsurpassed quality and comprehensive global service.
