It's RED, it's BLUE – it's an ILLIG New ILLIG RDF 85 System Live at Chinaplas

Heilbronn, Germany, March 03, 2022 – ILLIG Maschinenbau will present the RedLine RDF 85 thermoforming production system live for the first time at Chinaplas 2022 in Shanghai, April 25-28. Other highlights include the high-performance BlueLine thermoforming system IC-RDM 76Kb with end-of-line handling system, the compact packaging system HSU 35b for the production of cardboard blisters, and new ILLIG customer services. The company will focus its trade show appearance on sustainable and customer-oriented solutions at the National Exhibition and Convention Center, Hongqiao, in Hall 2.1, Booth 2.1G52. Chinaplas is the most important plastics trade fair in Asia and the most important presentation platform for ILLIG in the Asia-Pacific markets.

With the new RedLine RDF 85, ILLIG implements a variable mold interface and thus meets the need of many customers for a thermoforming machine that allows the use of molds from different manufacturers. ILLIG will present the first RDF85 as a world premiere live in Shanghai, running with a nine-cavity mold made by an ILLIG tool cooperation partner to produce APET trays. Numerous RDF 85 systems have already been ordered for the market launch.

ILLIG complements its BlueLine systems with RedLine segment

ILLIG introduces the new RedLine product segment with the RDF 85, thus expanding the company's portfolio. RedLine machines comprise a new segment of thermoformers in an attractive price-performance ratio. ILLIG BlueLine production systems remain the global benchmark for high-performance thermoforming machines. ILLIG offers the usual high quality and safety standards for both product segments.

About ILLIG

ILLIG is a leading global supplier of thermoforming and packaging systems as well as tool systems for cardboard, paper and plastics. The company's product and services portfolio includes the development, design, manufacture, installation and commissioning of complex production lines and components. With its unique approach to packaging development, "Pactivity® 360", ILLIG supplies its customers with resource-friendly and sustainable solutions. Through its subsidiaries and sales agencies, ILLIG is active in all markets around the world. For 75 years, the family business has been serving its customers as a reliable partner for the cost-effective manufacturing of complex precision packaging and parts with innovative technology of unsurpassed quality and comprehensive global service.
