

Extruder linkage kit

Using two light barriers at the film inlet the feed length of the RDK/ RDM is adapted to the speed of the extruder. With this feature, the RDK/ RDM must not be forcibly connected to an extruder, but can be also linked to the side machines RO, ROK, AWK and VHW.

Your benefits

- With this retrofit kit you will be able to run your machine with as an extrusion line.

Available for machines

RDM, RDK, RDKP with Siemens S7 PLC
